"Our excellent fourth quarter performance capped off a great year for Horizon," said Robert D. Pomeroy, Jr., Chairman and Chief Executive Officer of Horizon. "Net investment income of \$0.43 per share significantly exceeded our distribution level, while we increased our NAV. We originated seven new loans for \$65 million, growing our portfolio for the seventh consecutive quarter, and generated an annualized debt portfolio yield of 17.6%, which, again, showed the success of our predictive pricing strategy. We also maintained strong credit quality through our prudent and disciplined underwriting approach. As a result of our very successful 2019, we are proud to be able to reward our shareholders and their ongoing support with a special distribution of \$0.05 per share, in addition to our regular monthly distributions."

"Along with our exceptional results, we utilized our 'at-the-market' program during the quarter and issued an additional \$14 million of common stock at a premium to NAV," added Mr. Pomeroy. "As we look ahead, we continue to see considerable opportunities and strong market demand in the overall venture debt loan market. With our capital structure significantly enhanced, we are well-capitalized and we believe we are well-positioned to further grow our venture debt portfolio in 2020, while delivering regular monthly distributions and long-term value to our shareholders."

Fourth Quarter 2019 Operating Results

Total investment income for the quarter ended December 31, 2019 grew 47% to \$13.0 million, compared to \$8.8 million for the quarter ended December 31, 2018. The year-over-year improvement in total investment income is primarily due to growth in interest income on investments resulting from an increase in the average size of the debt investment portfolio, and a higher average prepayment fee rate earned.

The Company's dollar-weighted annualized yield on average debt investments for the quarter ended December 31, 2019 and 2018 was 17.6% and 16.7%, respectively. The Company calculates the dollar-weighted annualized yield on average debt investments for any period measured as (1) total investment income (excluding dividend income) during the period divided by (2) the average of the fair value of debt investments outstanding on (a) the last day of the calendar month immediately preceding the first day of the period and (b) the last day of each calendar month during the period. The dollar-weighted annualized yield on average debt investments is higher than what investors will realize because it does not reflect expenses or any sales load paid by investors.

Net expenses for the quarter ended December 31, 2019 were \$6.3 million, compared to \$4.8 million for the quarter ended December 31, 2018. The increase was primarily due to \$0.4 million of additional interest expense, \$0.6 million of higher net performance-based incentive fees and \$0.3 million in additional base management fees.

Net investment income for the quarter ended December 31, 2019 was \$6.5 million, or \$0.43 per share, compared to \$4.0 million, or \$0.34 per share, for the quarter ended December 31, 2018.

For the quarter ended December 31, 2019, net realized loss on investments was \$0.3 million, or \$0.02 per share, compared to a net realized gain on investments of \$0.9 million, or \$0.08 per share, for the quarter ended December 31, 2018.

For the quarter ended December 31, 2019, net unrealized appreciation on investments was \$0.6 million, or \$0.04 per share, compared to net unrealized depreciation on investments of \$1.6 million, or \$0.14 per share, for the prior-year period.

Full Year 2019 Operating Results

Total investment income for the year ended December 31, 2019 was \$43.1 million, an increase of 39% compared to \$31.1 million for the year ended December 31, 2018.

Horizon's dollar-weighted annualized yield on average debt investments for the year ended December 31, 2019 and 2018 was 16.7% and 15.3%, respectively.

For the full year ended December 31, 2019, net investment income was \$20.5 million, or \$1.52 per share, compared to net investment income of \$13.9 million, or \$1.20 per share, in the prior year.

For the full year ended December 31, 2019, net realized loss on investments was \$4.2 million, or \$0.31 per share, compared to net realized gain on investments of \$0.6 million, or \$0.06 per share, for the full year ended December 31, 2018.

For the full year ended December 31, 2019, net unrealized appreciation on investments was \$3.2 million, or \$0.24 per share, compared to net unrealized depreciation on investments of \$1.5 million, or \$0.13 per share, for the full year ended December 31, 2018.
