"We are proud of our second quarter performance, particularly considering the challenging environment in which we are operating," said Robert D. Pomeroy, Jr., Chairman and Chief Executive Officer of Horizon. "Specifically, we grew our portfolio through opportunistically originated loans to several quality life science companies with ample liquidity. Our predictive pricing strategy helped produce significant net investment income with solid prepayment activity in the quarter. In addition, we strengthened our balance sheet by enhancing our lending capacity through our newly amended credit facilities. Our increased debt capacity and additional equity raising through our ATM provides us with increased flexibility to further expand our diversified venture debt portfolio."

"While we enhanced our liquidity positioning and sourced new debt investments, we remained focused on proactively managing our existing portfolio of investments, and maintaining a stable credit profile," added Mr. Pomeroy. "That said, we remain cautious in our overall outlook in light of the ongoing impact of the pandemic. With our strong balance sheet and financial flexibility, along with our portfolio's stable credit profile, we expect to continue investing in life science and technology opportunities that meet our underwriting standards. We believe we continue to be well-positioned to deliver value to our shareholders."

### Second Quarter 2020 Operating Results

Total investment income for the quarter ended June 30, 2020 grew 29% to \$13.5 million, compared to \$10.5 million for the quarter ended June 30, 2019. The year-over-year improvement in total investment income is primarily due to growth in interest income on investments resulting from an increase in the average size of the debt investment portfolio.

The Company's dollar-weighted annualized yield on average debt investments for the quarter ended June 30, 2020 and 2019 was 16.9% and 16.8%, respectively.

The Company calculates the dollar-weighted annualized yield on average debt investments for any period measured as (1) total investment income (excluding dividend income) during the period divided by (2) the average of the fair value of debt investments outstanding on (a) the last day of the calendar month immediately preceding the first day of the period and (b) the last day of each calendar month during the period. The dollar-weighted annualized yield on average debt investments is higher than what investors will realize because it does not reflect expenses or any sales load paid by investors.

Net expenses for the quarter ended June 30, 2020 were \$6.8 million, compared to \$5.5 million for the quarter ended June 30, 2019. The increase was primarily due to \$0.4 million of additional interest expense, \$0.4 million of higher net performance-based incentive fees and \$0.3 million in additional base management fees.

Net investment income for the quarter ended June 30, 2020 was \$6.7 million, or \$0.40 per share, compared to \$5.0 million, or \$0.37 per share, for the quarter ended June 30, 2019.

For the quarter ended June 30, 2020, net realized loss on investments was \$0.7 million, or \$0.04 per share, compared to net realized loss on investments of \$4.6 million, or \$0.34 per share, for the quarter ended June 30, 2019.

For the quarter ended June 30, 2020, net unrealized appreciation on investments was \$1.9 million, or \$0.11 per share, compared to net unrealized appreciation on investments of \$4.1 million, or \$0.30 per share, for the prior-year period.

In June 2020, Horizon amended its \$100 million senior secured debt facility with a large U.S.-based insurance company to extend the investment period to June 2022, pursuant to which Horizon may borrow up to \$100 million under the terms of the secured notes. The investment period will be followed by a five-year amortization period. The stated final payment date was extended to June 2027, subject to any extension of the investment period.
