Farmington, Connecticut – August 4, 2026 – Horizon Technology Finance Corporation (NASDAQ: HRZN) (“Horizon” or the “Company”), an affiliate of Monroe Capital, today announced its financial results for the second quarter ended June 30, 2026.

Second Quarter 2026 and Recent Highlights

- Successfully completed merger with Monroe Capital Corporation (“MRCC”)
- Net investment income (“NII”) of \$7.4 million, or \$0.11 per basic share (inclusive of \$0.07 per basic share of non-recurring merger expenses), compared to \$11.4 million, or \$0.28 per basic share for the prior-year period
- Total investment portfolio of \$676.7 million as of June 30, 2026
- Net asset value of \$417.5 million, or \$6.23 per share as of June 30, 2026
- Annualized portfolio yield on debt investments of 14.9% for the quarter
- Funded nine loans totaling \$72.7 million
- Experienced liquidity events from four portfolio companies
- Cash of \$135.0 million and credit facility capacity of \$329.0 million as of June 30, 2026
- Held portfolio of warrant and equity positions in 88 companies as of June 30, 2026
- Undistributed spillover income of \$0.33 per share as of June 30, 2026
- Repurchased 1,365,222 shares of common stock at an average price of \$4.54
- Subsequent to quarter end, declared distributions of \$0.06 per share payable in October, November and December 2026, and, in accordance with the Company’s previously announced intent to make additional distributions with its undistributed net investment income, or “spillover” income, special cash distributions of \$0.03 per share payable in October, November and December 2026

“We were pleased to grow our debt investment portfolio for the third consecutive quarter, and to deliver NII which, excluding non-recurring merger expenses, covered our regular distributions,” said Mike Balkin, Chief Executive Officer of Horizon. “Unfortunately, we were disappointed to learn during June about some significant negative news for a single portfolio company, including the outlook for its future equity raising plans. This resulted in unrealized losses on our debt and equity investments in this company which contributed significantly to our decrease in net asset value per share at quarter end. Since the completion of the merger in April, we have been relentlessly working to source new, high-quality debt investment opportunities to deploy our capital and grow our portfolio, as evidenced by the increase in our committed backlog of approximately \$50 million from our prior quarter-end. With our significantly stronger balance sheet and increasingly robust pipeline, we believe we remain in an excellent position to further grow our portfolio, and ultimately drive long-term value creation for shareholders, while we continue to be a leading financial partner to the innovation economy.”

Second Quarter 2026 Operating Results

Total investment income for the quarter ended June 30, 2026 was \$25.0 million, compared to \$24.5 million for the quarter ended June 30, 2025, primarily due to higher interest income, including PIK income, on debt investments from a larger debt investment portfolio.

The Company’s dollar-weighted annualized yield on average debt investments for the quarter ended June 30, 2026 and 2025 was 14.9% and 15.8%, respectively. The Company calculates the dollar-weighted annualized yield on average debt investments for any period measured as (1) total investment income (excluding dividend income) during the period divided by (2) the average of the fair value of debt investments outstanding on (a) the last day of the calendar month immediately preceding the first day of the period and (b) the last day of each calendar month during the period. The dollar-weighted annualized yield on average debt investments is higher than what investors will realize because it does not reflect expenses or any sales load paid by investors.

Total expenses for the quarter ended June 30, 2026 were \$17.4 million, compared to \$12.7 million for the quarter ended June 30, 2025. The increase was primarily due to \$4.4 million of non-recurring merger expenses and a \$0.2 million increase in base management fee, partially offset by a \$0.4 million decrease in interest expense.

Net investment income for the quarter ended June 30, 2026 was \$7.4 million, or \$0.11 per basic share, compared to \$11.4 million, or \$0.28 per basic share, for the quarter ended June 30, 2025. The decrease in net investment income for the quarter ended June 30, 2026 was primarily due to the \$4.4 million, or \$0.07 per basic share, of non-recurring merger expenses.

For the quarter ended June 30, 2026, net realized loss on investments was \$6.1 million, or \$0.09 per basic share, compared to a net realized loss on investments of \$9.3 million, or \$0.23 per basic share, for the quarter ended June 30, 2025. For the quarter ended June 30, 2025, net realized loss on extinguishment of debt was \$0.8 million, or \$0.02 per basic share.

For the quarter ended June 30, 2026, net unrealized depreciation on investments was \$38.5 million, or \$0.59 per share, compared to net unrealized depreciation on investments of \$22.2 million, or \$0.54 per share, for the prior-year period.

Portfolio Asset Quality

Effective June 30, 2026, HRZN changed its internal credit rating scale to adopt the scale used by its affiliate Monroe Capital LLC, and its affiliates. HRZN made this change in order to improve consistency and efficiency in portfolio risk assessment by the affiliated entities, with whom it has made, and it anticipates it will continue to make, co-investments. Accordingly, HRZN's internal credit rating methodology was changed from a 4-to-1 scale (on which a 4 represented the highest credit quality) to a 1-to-5 scale (on which a 1 represents the highest credit quality).

HRZN's Advisor (i) rated all debt investments as of June 30, 2026 under the new 1-to-5 scale and (ii) recast the credit ratings of the debt investments for all of the prior periods presented in this release to the new 1-to-5 scale. The ratings and recast ratings in this release are made based on the same proprietary credit assessment process HRZN's Advisor regularly utilizes on a quarterly basis, as applied to the facts and circumstances existing at the applicable reporting date.

The following table shows the classification of Horizon's loan portfolio at fair value by internal credit rating, in each case presented under the updated 1-to-5 scale, as of June 30, 2026 and December 31, 2025 (recast):

(\$ in thousands)		June 30, 2026			December 31, 2025		
		Number of Investments	Debt Investments at Fair Value	Percentage of Debt Investments	Number of Investments	Debt Investments at Fair Value	Percentage of Debt Investments
Credit Rating							
1		—	\$ —	—%	—	\$ —	—%
2		32	547,063	84.4%	28	471,116	79.0%
3		2	21,606	3.3%	2	46,887	7.9%
4		4	47,991	7.4%	4	53,503	9.0%
5		5	31,339	4.9%	4	24,519	4.1%
Total		43	\$ 647,999	100.0%	38	\$ 596,025	100.0%

Under the updated 1-to-5 scale, HRZN's debt investments had a weighted average credit rating of 2.3 as of June 30, 2026. On a recast basis, HRZN's debt investments had a weighted average credit rating of 2.4 as of December 31, 2025. Weighted average credit ratings previously reported on the 4-to-1 scale (2.9 as of December 31, 2025) are not directly comparable to ratings under the updated scale due to the change in credit rating methodology. A rating of 1 represents a debt investment that is exhibiting the lowest level of risk and the debtor is generally significantly exceeding expectations (typically reserved for debt investments where a full repayment is expected in near term as a result of strong performance). Newly funded debt investments are typically assigned a rating of 2, which represents a debt investment performing as expected with risk factors that are neutral or positive since origination. A rating of 3 represents investments performing below expectations and indicates that the risk has increased somewhat since origination. A rating of 4 or 5 represents a deteriorating credit quality and an increased risk of loss of principal.

As of June 30, 2026, there were five debt investments with an internal credit rating of 5, with an aggregate cost of \$58.0 million and an aggregate fair value of \$31.3 million and there were four debt investments with an internal credit rating of 4, with an aggregate cost of \$57.1 million and an aggregate fair value of \$48.0 million. On a recast basis as of December 31, 2025, there were four debt investments with an internal credit rating of 5 (previously reported as a rating of 1 on the prior 4-to-1 scale), with an aggregate cost of \$33.8 million and an aggregate fair value of \$24.5 million and there were four debt investments with an internal credit rating of 4 (previously reported as a rating of 2 on the prior 4-to-1 scale), with an aggregate cost of \$56.8 million and an aggregate fair value of \$53.5 million.
